

# WEBSITE Review REPORT

## Executive Summary

A detailed review of the Quantira Technology website was conducted to evaluate user experience, navigation flow, content consistency, page functionality, and interface responsiveness. During the review, multiple issues related to page alignment, navigation transitions, missing pages, form functionality, content duplication, and FAQ behavior were identified.

This report documents the observations and recommendations for corrective action.

### 1. Home Page Issues

| S.No | Issue Description                                                        |
|------|--------------------------------------------------------------------------|
| 1    | Alignment issue observed in the FAQ section.                             |
| 2    | "Submit" button malfunction/alignment issue in the Get In Touch section. |
| 3    | Expanded Services section alignment inconsistency.                       |
| 4    | "Data, AI & Analytics – Know More" navigation/functionality issue.       |
| 5    | Alignment issue in the "Sompalli Srikant – View Profile" section.        |
| 6    | Duplicate issue identified with the Get In Touch Submit button.          |

### 2. About Page Issues

| S.No | Issue Description                                                                        |
|------|------------------------------------------------------------------------------------------|
| 1    | "Learn About QT Platform" button requires verification for navigation and functionality. |

### 3. Services Section Issues

#### 3.1 IT Solutions → Automation

Navigation bar transition issues.

Container transition/animation inconsistencies.

"Automate Your Workflow" section requires validation.

FAQ section transition issues.

Duplicate content appears in both navigation tabs and page containers.

#### Recommendation:

Review navigation structure, eliminate duplicated content, and standardize page transitions.

#### 3.2 Mobility & Engineering Services

Same issues identified as in the Automation section.

Repetitive content structure observed.

#### Recommendation:

Create unique service content and review page architecture.

### **3.3 View All IT Solutions**

Missing pages for listed solutions.

FAQ section transition issues.

Client names not properly displayed.

Contact box functionality/design issue.

### **3.4 Enterprise Applications**

Additional information appears incorrectly under navigation.

Legacy Modernization section requires content validation.

### **3.5 Digital Services**

Limited services displayed compared to navigation options.

FAQ section issues.

Client names displayed improperly below FAQ section.

Contact box functionality issue.

### **3.6 Development Services**

Contact Us forms contain issues across all development service pages.

"View All Development Services" page not found.

### **3.7 Data & AI Services**

"View All Data & AI" page not found.

Broken or missing page navigation detected.

## **4. Solutions Section Issues**

### **4.1 Enterprise Digital**

Enterprise Explore Solutions page missing.

Get In Touch section requires correction.

### **4.2 Startup Accelerator**

Reviewer/client names not displayed correctly.

Get In Touch section issue identified.

## **5. Resources Section Issues**

### **5.1 FAQs**

Search bar functionality issue.

Search results behavior requires validation.

### **5.2 Blogs**

Same search-related issue identified as FAQs.

"Leave a Reply" functionality requires review and testing.

## **Overall Findings**

The website currently contains issues in the following categories:

UI/UX Alignment Problems

Navigation and Transition Errors

Missing or Broken Pages  
Form Submission Issues  
Content Duplication  
FAQ and Search Functionality Problems  
Contact Section Defects  
Client/Testimonial Display Issues

### **Recommended Priority Actions**

#### **High Priority**

Fix all missing pages and broken links.  
Resolve Contact Us and Get In Touch form issues.  
Correct navigation transition errors.  
Restore View All Development Services and Data & AI pages.

#### **Medium Priority**

Fix FAQ search functionality.  
Remove duplicate content.  
Correct client/testimonial display issues.

#### **Low Priority**

Improve UI alignment and visual consistency across all sections.  
Standardize animations and transition effects.

### **Conclusion**

The website demonstrates a strong structure and service portfolio; however, several functional and user-experience issues require attention before production optimization. Addressing the identified issues will significantly improve usability, navigation consistency, customer engagement, and overall website professionalism.
