Malkajgiri, Hyderabad, Telangana

CAREER OBJECTIVE

Results-driven B.Tech student with hands-on experience in Python programming and full-stack development, seeking a Custom Software Engineer position to design, code, and enhance scalable software solutions. Committed to writing clean, maintainable code following software development lifecycle best practices and agile methodologies. Eager to collaborate with development teams and contribute to quality software products that meet business requirements.

TECHNICAL & PROFESSIONAL SKILLS

Programming Languages: Python, Java, SQL, HTML/CSS

Development Tools & Frameworks: Git, GitHub, TensorFlow, Keras, OpenCV, Scikit-learn, Pandas, NumPy, Matplotlib, Streamlit, Django, MERN Stack

Software Development Practices: Software Development Lifecycle (SDLC), Agile Methodologies, Version Control Systems, Code Testing, Debugging, Clean Code Principles, Documentation

Professional Skills: Problem Solving, Team Collaboration, Technical Communication, Adaptability, Code Review

EDUCATIONAL QUALIFICATION

Anurag University, Ghatkesar, Telangana

B.Tech in Artificial Intelligence and Machine Learning | Aug 2022 – 2026

Sri Chaitanya Junior College, ECIL, Telangana

Intermediate - Mathematics, Physics, and Chemistry | Aug 2020 – May 2022

Bhavan's Sri Ramakrishna Vidyalaya, Sainikpuri, Telangana

Secondary School Certificate | May 2010 – Mar 2020

PROJECTS & TECHNICAL EXPERIENCE

AI Automated Log Service | Python, Streamlit, ChromaDB, LangChain, Ollama, Git

Feb 2026 – Mar 2026

- Designed and developed a real-time log monitoring solution following agile development practices, implementing modular, scalable code architecture for production-grade observability.
- Integrated vector search capabilities using ChromaDB and LLM-based analysis, demonstrating proficiency in multi-component integration and software testing for fault-tolerant workflows.
- Implemented log normalization, data validation, and error handling mechanisms; maintained clean, documented codebase for team collaboration and future maintenance.

Early Alzheimer's Detection Using Tri-Modal Data Fusion | Python, TensorFlow, Keras, Scikit-learn

Oct 2025

- Architected and implemented a tri-modal machine learning model combining MRI, CT, and PET data, emphasizing clean code practices, modular function design, and comprehensive testing of component accuracy.
- Conducted rigorous testing and validation across ADNI and OASIS datasets, documenting preprocessing workflows and feature fusion strategies for reproducibility and knowledge sharing.

Online AI Doctor with Interactive 3D Model | MERN Stack, Gemini API, Blender, Git, GitHub

Feb 2025

- Developed a full-stack web application integrating frontend and backend components using modern frameworks, following SDLC best practices and collaborative Git-based version control.
- Implemented LLM API integration, 3D asset rendering, and responsive UI components; wrote maintainable, well-documented code with clear separation of concerns for team collaboration.

AI-Based Face and Danger Detection System | Python, OpenCV, TensorFlow, CNN, Git

Sep 2024

- Built a real-time computer vision application with optimized performance, demonstrating expertise in Python implementation, efficient code design, and testing for production-grade reliability.
- Developed CNN-based pipelines with debugging and optimization techniques, achieving low-latency performance; documented architecture and implementation details for knowledge sharing.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Python for Data Science: NPTEL (Skill India) – Feb 2025
- CCNA: Introduction to Networks – Cisco Networking Academy – Dec 2024
- Data Analytics Essentials – Cisco Networking Academy – Nov 2024
- Cybersecurity Essentials – Cisco Networking Academy – Jul 2024

ADDITIONAL INFORMATION

Languages: English (Fluent), Telugu (Native), Hindi (Conversational)

Professional Interests: Full-Stack Development, Clean Code Practices, Software Testing, Agile Development, Open Source Contribution, Generative AI Research
